

# Microsoft Security Workshop

## Improve Your Security Posture with a Microsoft Security Workshop

Struggling to manage a growing volume of data and alerts while dealing with tight budgets and vulnerable legacy systems? In today's environment, minimizing security risks is a massive challenge. Organizations can start achieving broader security objectives -- identifying current and real threats -- by scheduling a Microsoft Security Workshop with Protiviti.

Designed for today's security stakeholders, Protiviti's Microsoft Security Workshop will help you develop a strategic plan based on the recommendations from our Microsoft cybersecurity experts, customized specifically for your needs. You'll not only gain visibility into immediate threats across email, identity and data; you'll get valuable clarity and support on upgrading your security posture for the long term.

### Microsoft Security Workshop Value

Provide a Threat Check report to reveal visibility into threats to your Microsoft 365 Cloud environment across email, identity and data

Help you understand your security goals and objectives

Provide a tailored overview of Microsoft security capabilities

Showcase security scenarios with hands-on activities

Develop joint plans and next steps

# Microsoft Security Workshop

## What to Expect: Threat Check and More

During this workshop at your site or remotely, Protiviti will partner with you to strengthen your approach to cybersecurity. It starts by helping you better understand how to prioritize and mitigate potential attacks.

Prior to the workshop, our Microsoft experts will help you activate the Threat Check solution to gain visibility into threats to your Microsoft 365 cloud environment across email, identity and data. This will help you better understand, prioritize and mitigate potential vectors of cyberattacks against your organization. During the workshop, we will walk you through the comprehensive Threat Check results featuring deep analysis of real cyberattack threats we've found. These threats may include:

- Malware (including cloud-based and advanced zero-day malware)
- Phishing emails
- Compromised user accounts
- Malicious OAuth apps
- Suspicious user activities (risky sign-ins, etc.)

## In addition to the Threat Check report, you will receive:

- Actionable recommendations to help immediately mitigate the identified threats
- A detailed assessment of your IT and security priorities and initiatives, direct from cybersecurity pros
- An inside look at Microsoft's holistic approach to security and how it relates to your organization
- A hands-on opportunity to experience what integrated security looks like, including the latest tools and methods
- Long-term recommendations from Protiviti's Microsoft experts about your security strategy, with key initiatives and tactical next steps

**Who Should Attend?** The workshop is intended for security decision-makers such as:

- Chief Information Security Officer (CISO)
- Chief Information Officer (CIO)
- Chief Security Officer (CSO)
- Data Protection Officer (DPO)
- Data Governance Officer (DGO)
- IT Security
- IT Compliance
- Data Governance
- IT Operations
